PRESS RELEASE

i-FILTER® for Multi-Device
Available on mineo, an MVNO Service by K-Opticom

TOKYO, Japan (September 1, 2016) – Digital Arts Inc. (headquartered in Chiyoda-ku, Tokyo, Japan; CEO Toshio Dogu; "Digital Arts"; Code 2326), a provider of information security software and solutions, announced the release of i-FILTER for Multi-Device on mineo, an MVNO (mobile virtual network operator) service provided by K-Opticom Corporation (headquartered in Osaka, Japan; CEO Takao Fujino; "K-Opticom"). i-FILTER for Multi-Device will be available on mineo beginning September 1, 2016.

K-Opticom's MVNO service, mineo, is a multi-carrier service, which means that customers can continue to use their domoco or au cell phone devices, select from docomo or au cell phone plans, and easily switch plans upon request. K-Opticom also offers attractive data plans to effectively use up monthly data amount, such as *Packet Share* (share data with family), *Packet Gift* (share data with relatives and friends), and *Free Tank* (share data between users).

K-Opticom chose to adopt Digital Arts i-FILTER for Multi-Device as a way to provide a safe cyber environment for underage children, and will be available as an "Anshin Filtering" option for mineo users. Reasons for integrating i-FILTER for Multi-Device includes flexible settings on filtering strengths to match user preferences, apps filtering feature for Android™ devices, and a strong endorsement by the Parents and Teachers Association of Japan. This option is available for 350 yen a month (excluding sales tax) and can be subscribed at the time of signing up for mineo, or by going to "mineo mypage"- "optional services" for current mineo users.

Digital Arts strives to respond quickly to changes in environments surrounding connected devices, promote the importance of web filtering, and expand opportunities to offer this software for underage users to enjoy smartphones and other connected devices under a safe and secure environment.

■ **About i-FILTER for Consumers**　　**http://www.daj.jp/cs/** (Japanese only)

　i-FILTER for Consumers is a parental control software, endorsed by the Parents and Teachers Association of Japan. Websites inappropriate for children or that might present security concerns can be easily and accidently displayed by simply following links or using common words on search engines. i-FILTER for Consumers gives parents the control to block unintended websites, protecting children from countless high-risk pages that spread across the internet before they set their eyes on them. The i-FILTER for Consumers family include, i-FILTER 6.0 (software package for home), i-FILTER for Multi-Device (for multiple OS), and products tailored to smartphones, mobile phones, game devices, smart TVs, and other devices that connect to the internet.

■ **About Digital Arts Inc.**　**http://www.daj.jp/en/**

　Digital Arts, Inc. is a manufacturer of information security products with a unique patented web filtering technology at its core. It plan, develops, sells and supports internet security products on its own, while also delivering added value as the first Japanese manufacturer to launch a web filtering software in the industry. Digital Arts is highly recognized for its most comprehensive domestic web filtering database and its unique filtering technology patented in 27 countries and regions around the world. Digital Arts has become the top domestic supplier of web filter software i-FILTER (corporate and public-sectors), i-FILTER for Consumer, and i-FILTER Browser & Cloud. Other product lineup includes m-FILTER, a gateway email security software for corporations, m-FILTER MailAdviser, a client email anti-misdelivery software, D-SPA, a secure proxy appliance solution, and FinalCode, the ultimate password-less file encryption and tracking solution.
